## Work Experience

07.2023 - 09.2024

Company Name | Karat team

### Front-end developer

Implemented an online store to increase sales of goods and increase the company's income, which is connected with CRM system for comfortable work with orders.

It was linked via API CRM, Google Sheets, Keitaro that allowed to reduce the time spent on analyzing orders and their tracking.

Realized the change of time of storage of orders in the NP department to save the company's expenses for shipments.

Created new one-page websites for greater sales realization of product sales.

Developed a training site and quizTest to recruit new employees to the call center.

Also developed an online store on WP for another company that allowed to bring profit to the company with which I cooperated.

A corporate multi-lingual site on React was implemented, as well as an admin panel for managing the cards of services provided by the company. In the admin panel was added functionality of adding, editing, deleting cards of services with a choice of figures. Which are subsequently displayed on the page via API.

07.2022 - 02.2023

Company Name | Platona

### Front-end developer

Worked with technologies such as :

HTML, CSS, JS, Bootstrap, jQuery. Developed Frontend part for a large multi-page online store, as well as single page sites. I developed responsiveness, created forms, modal windows, carousels, menus, worked with map api using HTML, CSS, JS, Bootstrap.
